

EXTRA LABMEETING THURSDAY JUNE 2!

Dr. Paul Mullins, School of Psychology, Bangor University, and Bangor Imaging Center, North Wales, UK is giving an invited lecture in the Labmeeting Series on:

" In Vivo Measurement of Neurotransmitters using Magnetic Resonance Spectroscopy – What, How and Why?"

THURSDAY JUNE 2, ROOM 110, BB-building, 9th floor, 14.00 -15.00

Paul Mullins' research primarily focuses on measuring functional dynamics of the neurotransmitters Glutamate and GABA in response to external and internal stimuli. His research has substantially contributed to increasing the feasibility of in vivo fMRS.

All welcome,

Kenneth Hugdahl/Bergen fMRI Group
